PROFILE

Senior engineer with 15+ years across frontend, backend, mobile, data, APIs, and cloud architecture. Known for disciplined execution, clear communication, realistic estimates, and reliable ownership from architecture through production support.

CORE STRENGTHS

- Frontend architecture
- End-to-end delivery
- Testing and reliability
- Team leadership and mentoring
- Cloud and API architecture
- Product and UX judgment

Many great minds lack one thing - discipline

PROFESSIONAL SUMMARY

Senior full-stack engineer with 15+ years of experience building customer-facing products, reusable frontend systems, and scalable APIs with TypeScript, Node.js, and PostgreSQL. Strong background in React, React Native, third-party integrations, testing, security, and end-to-end product ownership. Verified Toptal engineering expert since 2019, with experience leading teams and taking products from requirements and architecture through deployment and production support.

RECENT EXPERIENCE

My Caddie | Founder & Lead Full-Stack Developer

2026 - Present

Independent product development | Remote

- Own product definition, workflow and UX design, architecture, implementation, automated testing, security, documentation, and managed-cloud delivery for a responsive golf-club SaaS product.
- Build a service-oriented **TypeScript** backend with AdonisJS, Lucid, and PostgreSQL, plus a Vue 3, Vite, and Vuetify frontend with explicit validation and maintainable application boundaries.
- Delivered registration, email and phone confirmation, recovery, rotating sessions, legal-consent, responsive dashboard, transactional email, and SMS workflows.
- Designed a Yandex Cloud topology with an application load balancer, private compute, managed PostgreSQL, rate limiting, lockouts, structured logging, and automated tests.

Share A Refund | Senior Full-Stack Developer

Dec 2022 - Aug 2026

Remote

- Modernized a shipping-audit platform by rebuilding its Zend backend on Laminas and migrating the server-rendered AdminLTE frontend to **Vue 3, Vuetify, and Material Design 3**.
- Replaced service locators and circular dependencies with explicit dependency injection and factories, improving modularity and testability across controllers, services, APIs, reports, and workers.
- Improved billing-sensitive UPS, FedEx, and DHL workflows through third-party API integrations, validation, automated tests, data migrations, queue diagnostics, and careful regression verification.
- Contributed to Ask SARA, an AI-powered in-app assistant that helps users search the platform, navigate workflows, and understand product and business data.

Socol | Head of Development

2021 - 2022

Remote

- Led architecture and delivery for a complex product spanning a cross-platform **React Native** application, React/Next.js web interfaces, commerce, content, and blockchain functionality.
- Worked hands-on with **TypeScript**, Node.js, Prisma, TypeORM, PostgreSQL/MySQL, AWS Lambda, Amazon S3, and Terraform across mobile, web, APIs, and SDKs.
- Integrated third-party services including Stripe, Twilio, and OAuth providers across payment, messaging, and authentication workflows.
- Led technical brainstorming, made critical architecture decisions, coordinated delivery, and raised technical problems and their business impact directly with the CEO while remaining hands-on in implementation.

TECHNICAL SKILLS

FRONTEND

TypeScript, JavaScript, React, React Native, Redux, Next.js, Vue 3, Angular, Backbone.js, Chart.js, HTML, CSS, Sass, Vite, Vuetify

BACKEND & APIs

Node.js, REST API design, SOAP, TypeORM, third-party integrations, Twilio, Python, PHP, Ruby on Rails, GraphQL, microservices, serverless systems, background workers

DATA & CLOUD

PostgreSQL, MySQL, MongoDB, Redis, AWS Lambda, Amazon S3, Yandex Cloud, Terraform

QUALITY

Jest, Cypress, Cucumber, functional, visual, integration and E2E testing, Git, code review

WAYS OF WORKING

Architecture, mentoring, Agile, Scrum, Kanban, distributed collaboration

CERTIFICATION

Front-End Web Developer

Nanodegree
Udacity, 2016

LANGUAGES

English
Russian

PROFESSIONAL EXPERIENCE

Sensor Tower | Senior Full-Stack Developer

Mar 2021 - Feb 2022

Independent consultant | Remote

- Built and maintained features for a data-intensive digital market intelligence platform, working across **Ruby on Rails** APIs and a **Backbone.js** frontend.
- Expanded functional and visual regression coverage with **Cucumber** and **Cypress**, improving confidence across backend and user-facing workflows.
- Added aggregation and summary API endpoints, processed high-volume datasets, and rendered results dynamically through **Chart.js** visualizations.

Reddit | Senior Full-Stack Developer

2020 - 2021

Remote

- Developed consumer-safety and platform functionality used at large scale with **React**, **Redux**, **TypeScript**, **GraphQL**, **REST APIs**, **Python/Django**, **PostgreSQL**, and **microservices**.
- Architected a configuration-driven framework spanning reusable React components and API behavior, enabling teams to build complex workflows from structured JSON.
- Extended moderator filtering and user-reporting capabilities, increased automated test coverage, and influenced major features through design and pull-request reviews.

Toptal | Engineering Expert

2019 - Present

Selected client engagements | Remote

- Verified Toptal engineering expert since 2019, trusted to join unfamiliar systems quickly and independently own frontend, full-stack, mobile, architecture, and cloud delivery.
- Across client engagements, designed and delivered user-facing products, complex workflows, backend services, third-party integrations, and modernization work using **React/Redux**, **Vue**, **TypeScript**, **Node.js**, **Python/Django/Flask**, **REST/GraphQL APIs**, **SQL databases**, **cloud platforms**, **Jest**, and **Cypress**.

Agency, Mai? | Lead Full-Stack Developer

Mar 2018 - Jun 2019

Remote

- Designed and delivered high-complexity applications using **Vue**, **React**, **Node.js**, **PHP**, **WordPress**, and **Sass**, translating visual requirements into maintainable architectures.
- Improved multiple sites beyond a 95 PageSpeed score and built an incremental processing workflow for data files up to 1 GB without stalling the application.

goTRG (The Recon Group) | Frontend Developer

Aug 2014 - Mar 2018

Saint Petersburg, Russia

- Built e-commerce and reverse-logistics interfaces with **React**, **Angular**, **JavaScript**, **Sass**, and **jQuery** while integrating **SOAP** services and contributing to **Node.js**, **PHP**, **Meteor**, and **WooCommerce** backends.
- Created efficient frontend build environments and contributed to a large e-commerce implementation that secured a multi-million-dollar Walmart contract.

oDesk / Elance | Frontend Developer

Jul 2011 - Aug 2014

Remote

- Delivered frontend projects for international clients, building repeat business through reliable execution, clear communication, and long-term working relationships.

EDUCATION

University of Bath

BEng (Hons), Civil Engineering

2010 - 2014

Bath, UK
